Brain Lab Works Ltd. designs and develops turn-key software solutions for both clinical and scientific domains in a wide range of programming environments, including custom experiments software solutions in Psychology, Neurosciences, and Brain Research domains.

Our extensive knowledge gained over the last decade allows us to guarantee high-quality solutions tailored to the needs of research facilities, commercial enterprises and educational institutions in the field of human performance measurement and brain sciences.

We provide diverse professional solutions allowing you to maximize your research capabilities leveraging your ability to focus on science and innovation.

Introducing our new all-inclusive solution for research labs:

**PRO LAB 360° PLAN**

The Pro Lab 360° plan includes:
- Experiment programming in E-Prime, Matlab and Python and web-based data collection solutions.
- Advanced software solutions for integrating and synchronizing equipment including Eye Trackers, Peripheral Physiology, fNIRS, EEG, etc...
- Custom hardware solutions for stimulation, response collection, and equipment integration.
- Data aggregation, storage, and mining solutions.
- Data analyses and statistical support in the fields of EEG, Eye-Tracking, Neural Imaging, Peripheral Physiology, Behavioral Experimentation, Observation Laboratories (video and audio).
